The Director General
NSW Planning and Environment
Bridge Street Office
23-33 Bridge Street Sydney
GPO Box 39
Sydney NSW 2000

Attention – Chris Ritchie

Dear Chris,

I refer to correspondence with your Thomas Piovesan, regarding construction of a replacement biofilter on the Teys Australia Wagga Wagga site.

Tey's are planning the replacement of the biofilter due to deterioration of the existing biofilter structure. A new biofilter is necessary to ensure the sites ongoing compliance with DA 220-07-2002 Mod 6 and also Environmental Protection License 2262 in regards to odour.

To ensure there is no disruption to site operations or impact to local amenity, the new biofilter will be constructed next to the existing (figure 1). The commissioning of the new biofilter also involves performance testing to be carried out by *The Odour Unit*, to ensure there is adequate treatment of the air stream. Once performance testing shows the biofilter is performing to the required standard, the existing will be demolished.

As advised in previous correspondence, a modification to DA220-07-2002 Mod 6 is required. We therefore request the department provide Secretary's Environmental Assessment Requirements (SEARs) for the modification.

If you have any queries or concerns in relation to the new biofilter, please do not hesitate in contacting the site Environment Supervisor, Dean Loughran, direct on 6938 3258.

Yours Sincerely

Andrew Ross
General Manager
