3<sup>rd</sup> September 2010

**Re: Statutory Update of the Woodlawn Wind Farm Modification SEE**

To Whom It May Concern:

The Statement of Environmental Effects (SEE) submitted for the modification to the Development Approval for the Woodlawn Wind Farm to the NSW Department of Planning on the 3<sup>rd</sup> September 2010, was originally written in the context of being assessed as a Section 96 modification under Part 4 of the Environmental Planning and Assessment Act 1979 (the Act).

Since that time the author has become aware that due to a rule change the SEE will no longer be assessed as a Section 96 modification under Part 4 of the Act and instead be assessed as a Section 75W modification under Part 3A of the EP&A Act 1979.

There is no material change required to the SEE due to being assessed under Part 3A rather than Part 4, however we request that any references to assessment of the SEE as a Section 96 modification under Part 4 should now be considered instead to refer to a Section 75W modification under Part 3A of the Act.

Yours Sincerely,

  
**David Griffin**  
Director
