Matthew,

Re: Wambo Coal Mod 14

DA 305-7-2003 MOD 14

The DSC has received the Environmental Assessment Report and development application for Modification 14 for the Wambo Underground Coal Project.

The application area impacts the existing Wambo South Water Dam a prescribed dam and the notification area that surrounds it. Wambo Coal have been in discussion with the DSC about the need to apply to the DSC prior to mining within this area.

kind regards

Heather

Dear All,

The Department has recently received a modification application and Environmental Assessment (EA) from Wambo Coal Pty Ltd, seeking approval to modify its existing North Wambo Underground Coal Mine in the Hunter Valley (DA 305-7-2003 MOD 14).

The proposed modification involves the development of an additional underground longwall panel (Longwall 10A) in the Wambo coal seam, contiguous with the existing North Wambo Underground Mine. The application and the EA were made available on the Department's website this morning, via the following link:

http://majorprojects.planning.nsw.gov.au/index.pl?action=view_job&job_id=6720

The Department would like to invite your assessment and comments on the proposed modification and would request that you send these responses to matthew.sprott@planning.nsw.gov.au, by Friday 17 October 2014.

I have arranged for Wambo Coal to distribute hard and electronic copies of the EA, in accordance with the attached distribution list, and believe that these document should have arrived at your offices this week.

If you have any further queries regarding the above, or if you do not receive a hard copy of the EA and would like one, please contact me on 9228 2054.

Kind regards,

Matthew
