### Modification Description

Extension to the extraction area and stockpile areas along with modification to the water management system of the Quarry. As a result of the proposed increase in the available resource (by 12 million tonnes) the life of the Quarry is proposed to increase by 25 to 30 years.

No significant change is proposed to processing operations and no change to production rate or product transportation is proposed.

How is the modification substantially the same as the original development?

- The type of development, namely extractive industry, remains the same with no additional development types proposed.
  - No increase in annual production limits, extraction methods, processing methods, product transportation or operating hours is proposed.
  - The predicted impacts of the Proposed Modification would remain equivalent to those approved by DA 344-11-2001.
- Supporting legal opinion from Hicksons Lawyers is provided as Appendix 1 of the Statement of Environmental Effects.
