**Dendrobium Coal Mine Modification 8 – Surface Supply Upgrade (DA 60-03-2001 Mod 8)  
Comment on the Environmental Assessment**

I refer to the email of 20 June with respect to the above matter. Comment has been sought from relevant branches of the Department of Primary Industries and Lands & Water. Any further referrals to Department of Industry can be sent by email to [landuse.enquiries@dpi.nsw.gov.au](mailto:landuse.enquiries@dpi.nsw.gov.au).

The department provides the following comments and recommendations for consideration in assessment of the proposal.

**Works on waterfront land**

Works within waterfront land (i.e. 40 m of the high bank of the American Creek) should be undertaken in accordance with the [Guidelines for Controlled Activities on Waterfront Land](#) (DPI 2012). This includes managing sediment and erosion control during construction until the site is stabilised, reinstatement of the ground level, stabilisation via revegetation, and mitigating runoff and disturbance impacts to American Creek. If works are required within the bed and banks of American Creek further consultation with the Department of Industry Lands and Water is requested.

**Recommended Conditions of Consent**

- A Construction Environmental Management Plan is to be developed in consultation with DoI Lands & Water prior to commencement of construction.
- Works within waterfront land are to be in accordance with the Guidelines for Controlled Activities on Waterfront Land (DPI 2012).

Yours sincerely

Alison Collaros
