15<sup>th</sup> December 2018

My name is David Ryan, and I wish to express my support for the Construction of the Crudine Wind Farm.

The construction of the Crudine Wind Farm operation will provide a significant boost to the regions financial sector and would become beneficially linked to many local industries including transportation, construction, environmental management, geological services and education.

I am the Director of a local Surveying Company that has been contracted by Zenviron Pty Ltd for ongoing Surveying Services across arrange of applications at the Crudine Wind Farm Site.

We are excited and motivated by the anticipated ongoing Surveying works offered by Zenviron over the next 18 months.

In anticipation of this continuous contractual engagement, our company, O'Ryan Geospatial Pty Ltd, has engaged two new employees and purchased a considerable amount of new Surveying Equipment and Vehicles in order to provide immediate and constant ongoing Surveying Services to Zenviron Pty Ltd during the construction phase of the Crudine Wind Farm Project.

O'Ryan Geospatial is looking forward to growing our locally based business, and its Technical Services, on the back of contracts with strong, reliable companies with regular construction commitments.

Any disruptions or delays to the construction phase of the Crudine Wind Farm project will put significant and serious financial pressure on our company.

Yours Sincerely

David Ryan

Director

O'Ryan Geospatial Pty Ltd
