OBJECTION- SGS Building too close to residences

I live in the department of Housing at 29 Lawson St. I am very worried about the effect of this SGS Sports building on my life and health. I am elderly & live alone.

I lived in Dept of Housing at Millers Point The Rocks for many years. I was very happy and satisfied there Unfortunately the DOH sold off that property and forced everyone to move

I was offered a few places but I CHOSE this one in Paddington. I have lived here for 4 years.

I chose this flat because it is QUIET, I am at the back of the building: also because I get FRESH AIR from the harbour, we get LIGHT SUNLIGHT warmth in winter, we have a healthy open view of green playing fields and the sky ,especially from the back bedroom .

My back window is very close to the building site a few metres away.

When the SGS Sports is built we will have no air, no light, no sunshine , no warmth. We will be looking out on a brick wall right outside our window.

The noise of drilling and building of the ENCORE flats on Neild Ave was very disturbing - our building was shaking.

The SGS building is so much closer and the NOISE will be terrible , from 7am daily and on Saturday. Then continuous noise in operation .Our peace will be gone.

I ask that you build it somewhere else on the field away from Housing.
