CSELR Modification%204%20-%20Main%20Report.pdf

'Transport for NSW' intends to increase the traffic by at least 90% essentially by moving the high street bus stops to Clara Street and diverting more buses to this route. This would involve the removal of at least another 10 valuable parking spots in an already highly stressed area for parking, especially for residents, and for the many less mobile people unable to take public transport when visiting the hospital or for their medical appointments. In addition the set back of the dwellings in Clara Street are for the most part almost on the boundary with the street, thereby exacerbating the noise and loss of amenity that would follow this proposed change.

We, the undersigned strongly object to the proposed changes.

Clara Street

- also Clara St is only 1/2 residential zone
now which is ridiculous
- Highways to
- does increase traffic & will make
this a road even less attractive.
