 Scanning Room

My wife and I are very concerned at the ludicrous prospect of Santa Sofia College being built in the middle of the proposed Gables shopping centre. The economics of the plan might be reasonable from a costing point of view BUT it is short sighted, illogical and is not in the overall interest and benefits of the students and families. It would appear that the facilities proposed fall short of the standards necessary to produce healthy and environmental outcomes and totally disregards the potential for future expansion. We understand that the Terry Rd site is 5 times larger and suggest THAT this site would be ideal. May we refer to Oakhill College complex which really sets the proper standards necessary. SPACE IS IMPORTANT AND PARAMOUNT.

This is a Catholic College which needs the support of all interested parties including, of course, those parties who are expected to fund eventualities. Business interests should be secondary.

Please seriously consider all aspects of this plan with particular the concerns of the parties REALLY EFFECTED - the students and their families.

Yours faithfully

Camilleri
