ATTENTION: - James Archdale.

James,

I am writing this letter to you with my statement of support to the project my reasons of support.

I believe that using wind power for electricity is a much better way as it won't pollute our already polluted environment.

The burning of fossil fuels is one of the main reasons for the depletion of the ozone layer, in my opinion. I have no science degrees or anything but I can see what is happening, to our world. With so many pollutants in the air, peoples health are suffering.

I'm not a hippy, tree-hugger but using wind power can only improve the environment, not pollute it any more.

I have at least 60 solar garden lights in my front & back yard. Using the power from the sun has my yards colourful of a night. I may only be one person trying to do my bit for the environment but every little bit can help.

Thankyou for your time,

Tanya Frazer
