To Western Harbour Tunnel
Beaches Link

Dear Sir,

I am a longtime resident of Northbridge and I have lived in this attractive, popular street, Pyalla Street which will be greatly affected by this tunnel project.

Tunnel consequence

I realise that one tunnel will pass under my property and that will not be good. I really object to this happening as this could potentially lead to significant devaluation of my property.

Bush Land

I really object to the cleaning of the Bush at the bottom of Pyalla Street. We need those trees. It is the home of a number of our native creatures. We have bandicoots, brushtail possums, ringtail possums. We are pleased to hear the Kookaburras warn of coming rain, and the magpies trill. Sometimes we see the powerfull owls come up from the gully. We have already caused the death of so many many creatures in our bush since 1788. We need to keep all the bush we do still have.

Contamination

I am very concerned^{about} and I object to the "stirring up" of the contaminated soil both in our Bush in Flat Rock Gully and under Middleharbour - leave Well alone!!

Noise and Health

The noise from 900 trucks a day on Flat Rock Drive, on 5½ days a week will fill the air around here. Definitely not good for anyone's health. I object to the fact that there will not ~~be~~ adequate noise barriers to prevent this traffic noise from reaching me and my neighbours.

Site Relocation

Please leave our Bush to the east of Flat Rock Drive alone.

The diamond baseball courts to the west of Flat Rock Drive could be relocated somewhere else and Our Bush could stay. In this age of Climate Change we need our trees to remain.

Public Transport

Also I am surprised that these roads and tunnels will not be used by public transport.

Yours sincerely
