MY OBJECTIONS TO WIND TURBINES BEING ERECTED IN THE NUNDLE DISTRICT.

I have pictured in my mind what an eyesore Wind Turbines would be as I drive down into Nundle and the surrounding area.

Blotting out our beautiful views...One of the reasons most of us came to live here in Nundle in the first place.

Friends & Family have also put forward their views, stating what a terrible shame it would be to spoil this pristine all round view of our valley.

My fears are that the turbines would continue to be installed around to the west of Nundle if they were to get a foothold in this area. This would be a hideous & intolerable view to have to bear along with the Red lights at night time.

It makes me wonder about those folk who are wanting these eyesores to go ahead. would they like them to be in their view 24/7.

I fear the danger & difficulty put in front of our Rescue Helicopter teams of which we depend on for our sick & injured local and not so local residents, along with small Aircraft and not to mention Fire Fighting vehicles & Fire Fighting Aircraft.

There would be a definite obliteration to our Fauna & Flora most unique to this area, and if disturbed would never be able to regain other habitats and therefore killing out many species.

The quietness and loveliness of Nundle would be disrupted with continuous heavy traffic passing through along with other W.T disturbances which accompany them.

Roads would be damaged continually with Dangerous Heavy Vehicles.

It is a known fact that there have been health issues related to W.T.

Landslides are bound to be a constant problem along the Great Dividing Range.

What happens if one or more of the turbines collapses of which they have been known to do. Who would be responsible for taking away the huge amount of rusting remains?

Tourists will be put off coming to this lovely area which in turn will affect our local stores and industries.

What could possibly be beneficial to our Nundle village & residents including surrounding residences by having these invasive ugly intrusions trespassing along our beautiful Great Dividing Range.
