We are asked - Please switch off air conditioners and electrical items to save our environment. Can someone please explain to me the following.

Please let us destroy the environment at Hanging Rock, Crawney and Timar to put a wind farm so we can create power so we can save the environment. Very confusing, maybe someone should look a little further west of NSW to the vast plains and propose solar panels as it seems a much cheaper option, cheaper in every way to do. Again maybe some of these people do not really care about the environment. They are looking after one thing, lining their pockets. I guess this gives us something to think about.

I wish you all the best of luck!
