## REASON FOR OBJECTION

- This project will impact on the water catchment area, the Isis, Barnard and Peel river systems supply a vast area and large number of people, no studies have been undertaken to research any potential issues.
- The ridgeline is very steep and turbine construction will cause large amounts of erosion.
- The visual impact. Our property is in the under the 5-kilometer range our property will be in direct line of sight of the wind turbines. We enjoy our beautiful views and would like to keep them!
- This project will have negative effects on our property value.
- Aviation lighting on the wind turbines will ruin our night sky views.
- The increase in traffic during the construction will affect the safety of other using the roads either to get to school, work or just to use the local shop.
- There are no guarantees this project will not negatively affect our stock and working dogs, on which my livelihood depends.
- Complete lack of community consultation for all the areas concerned.

Yours Sincerely,
