TO WHOM IT MAY CONCERN

RE: HILLS OF GOLD WIND FARM APPLICATION NO. SSD 9679

- I am attaching my submission to the above mentioned development application
- I hereby declare that I object to the Hills of Gold Wind Farm proposal ID no. SSD 9679
- I would like my personal details withheld
- I have not made any reportable political donations in the previous 2 years
- I have consent for this to be written for me as I dictate for I am elderly.

I wish to submit my objection to the proposed windfarm at Hanging Rock and Nundle. My concerns are for the village of Nundle which I understand the removal of trees within ^{for transportation.} the village may have to be removed. The transportation of blades, parts and construction materials will be dangerous to the town. The transport will go straight past the Nundle craft shop, post office and the supermarket. As an elderly citizen, the no parking will be extremely unsafe and disruptive. The Nundle Garden Club began in 1980 with Quiridi Ladies insisting on help our club (with over 60 members) ~~to help~~ to make sure the club would be established. Our aim was to plant trees in our village to beautify the town. We went to great lengths to make sure the trees were planted. We had limited money, chose the trees and was offered help by local Hanging Rock resident to bring our trees all the way from Sydney. We also made sure we kept the trees alive, keep going through droughts and floods ~~to be~~. These trees are admired by 1000's of tourists which come to our village for peace and tranquility - I understand with 2 year disruption, the town will be detriment to our tourist industry and businesses which is currently visited ^{from the} by 1000s of tourist & city. Our Garden Club planted these trees for the enjoyment of local people and for the future generation. It must be preserved and left untouched.

OBJECTION

I am also appalled for the destruction of the natural environment and habitat where a proposed road to avoid the Devil's Elbow. Another environmental disaster on a grand scale especially to our native flora and fauna
