

SUBMISSION FOR SUPPORT

I am in support of the wind farms for

- renewable energy
- local industry
- job increase.

I would like to see the wind farm

- increase population and in turn see the council look at subdivision and increase health facilities.

Without such facilities as the hotel, Nundle would be very different. Without local trade and staff the hotel may cease to exist.

Overall, Nundle is a dying town with an ageing population. I feel that a mix of ^{increase in} industry and technology has lead to this issue. The wind farms have the opportunity to increase our towns population, increase industry and improve health care if managed correctly.
