

## **OBJECTION**

My family have lived in Nundle for three generations as local farmers. I was born and raised here and have chosen to retire here. Never in my life did I expect to have to deal with such an outrageous development proposed to an area with such history and rural character. Building 70 wind turbines along the ridge is just not fitting for a place like this.

I sold my family property just over a year ago to retire in Nundle Village. I also bought a small lifestyle farming block just outside of town to stay active.

The wind farm will be seen from kilometres away and even more imposing on approach to town. Nundle village sits in the valley just under the ridge. It will have 70 turbines towering over the town centre. There is no escape from seeing them wherever you go.

From my place I will can see the whole ridge line up to the valley. I will have full impact from this wind farm.

I travel back and forth from my home in Nundle village to my property just outside of town. The proposed traffic will make it difficult and complicate my travel movements. No parking in the main street is simply ridiculous. Every truck and vehicle during construction period will travel straight past my front door. I cannot imagine how terrible it will be for me with lack of sleep from the noise during both day and night.

Property price for lifestyle blocks and houses especially with views of wind turbines will be heavily devalued. Not much worth investing in Nundle for anyone if this project goes ahead.

I wish to remain living in Nundle, so please do not build a Windfarm here.
