I write to object to the proposal of establishing two additional sand extraction areas (Stages 5a and 5b) at Dunmore.

Briefly, my objections:

- 5a – Dunmore House land – what an eyesore this will be! In close proximity to Minnamurra River – there is already water running into the River from current sandmining – I have seen the impact it is having on the river.
- Local traffic will be severely impacted during the sandmining process and rehabilitation process
- Noise pollution
- Air pollution
- Road surfaces damaged
- Detrimental effects on ground water quality
- Removal of sensitive/endangered forest – there is a large area of native orchids in the 5b area which will be destroyed!
- Concerned about the major detrimental impacts on Minnamurra River!!! Destroy this area and you destroy the pristine River and the local and tourist enjoyment of this area
- Detrimental impact on the flora and fauna!!
- Leave this area alone please.

Signed Bob Sinclair
