to council

3/13/16

Hi

My Names Ben Malter, EC member and owner occupier of unit 907 at One Central Past East, 3 Carlton St Chippendale. I have been living here over the last 2 and a bit years since the building finished construction and a new roof top bar has opened up next door that has made my unit and many other people units in this building unlivable during the day till 10pm due to very loud constant music and chatter. I took this video **attahced** showing the proximity and it blows my mind a roof was never built if it was intended on being a loud bar. My DB meter reads between **70 and 80** while standing in my living room. Please review this video and let me know what steps can be taken as it always feels like im standing at the bar about to yell over someone to order a drink.

Look forward to seeing what can be done about this

thanks for your time.
