

#### Objection to Champions quarry modification 4

I object that the quarry operation has not provided evidence of an ability to comply with all consent conditions.

Has the quarry paid the \$3000 fine to the Dept from 25 January 2018?

Has the quarry paid the \$15,000 fine to the Dept from 19 June 2017 ?

Has the quarry paid road contributions as required since the official caution in 2016 re failing to do so?

Has the quarry ever supplied 50 laden trucks per day ? There is no clear evidence of a need for product from this quarry. There has been no history of customers wanting this product in large volumes as predicted for doubling truck numbers.

Has the quarry provided evidence that the operators are capable of complying with safety and all consent conditions for 50 laden trucks per day as currently permitted ? The operators need to provide the Dept of Planning & Environment with a history of safety and logistic compliance in relation to 50 laden trucks first.

Will the quarry comply with consent conditions by including a local community member on the Community Consultative Committee? Without a community member that can be consulted without risk of intimidation, the whole point of the Community Consultative Committee is futile.

Will the quarry comply with consent condition Schedule 5 , Condition 4 to provide the 2017 Annual Review to the Dept by March 2018?

Will the quarry comply with consent condition Schedule 5 Condition 11(a) to make that information publically available on the quarry website?

Will the quarry comply with consent condition Schedule 5 Condition 11 (b) “keep this information up to date.”

Has the quarry complied with CONDITION 46 OF SCHEDULE 3 OF THE PROJECT APPROVAL (CONSERVATION AND REHABILITATION BOND)?

Has the quarry complied with CONDITION 47 OF SCHEDULE 3 OF THE PROJECT APPROVAL within the allotted time ?

I ask that the Department of Planning & Environment ensure that the quarry provide evidence of its ability to comply fully with consent conditions and in particular in relation to the unproven track record for large scale production before granting this modification.

Do not publish my name or address.

Do not supply my name or address to the quarry owners, operators, directors, partners, shareholders, staff or families of any of these.
