Dear Ms Jones

As a ratepayer in the Upper Lachlan Shire and having seen the devastating effect wind turbines are having on our local environment and community, I must request that before Goldwind are allowed to proceed with a modification application to amend their original application and taking into account that the developers have already moved 69 of the 73 turbines without notification, that the Department of Planning commission a truly independent survey of the distances of turbines from non-host residences and also the distances between turbines.

I also request that this independent study provide a comparison of these distances to those provided in the original EIS.

I believe independently sourced information is essential, given that Goldwind has offered no accurate information to date.

I also believe that Goldwind is acting in an underhand way by deliberately moving these turbines with no previous notification to either the Department or to those non-host residents most affected by any new developments.

It is incomprehensible that Goldwind could breach the Land & Environment Court judgement without being penalised. No doubt the Department's compliance regime will ensure this never occurs again.

Your swift action in this instance would be much appreciated.

Kind regards

Grant Winberg
