Dear Ms Jones,

I request that before any modification application of the Gullen Range Windfarm is put on public exhibition, the NSW Department of Planning and Infrastructure undertakes an independent survey of the distances of turbines from non host residences and also the distances between turbines. Further that this independent study includes a comparison of these distances to those provided in the projects original EIS.

In order to write submissions to this modification application I believe that this independently sourced information is essential. Local residents, effected by this development can no longer feel that information provided by the developer is accurate and credible.

Kind regards

Dr Georgina Chambers
