

Re: Gullen Range Wind Farm

Modification to Project Application - Wind Farm

Application Number: 07_0118 MOD1

To Whom It May Concern,

Our property at 1457 Pomeroy Rd, Pomeroy has been in the family since the late 1800s, yet we have had zero consultation from the wind farm company and our residence has been left off the maps entirely. The only way we were made aware of the situation was through communications with our neighbours not long before the turbines were actually erected. Based on the maps viewed via the internet, we have multiple turbines in close proximity to the north, west and south of our property. Actual numbers cannot be determined as our property is not represented on the maps. Therefore shadow flicker and noise that may affect us has not been assessed. We feel that this oversight in such a development is unacceptable. We have contacted the Department of Planning numerous times in the attempt to gain some response, to no avail. It is hardly likely that the oversight is coincidental, after so many attempts at contact. We eagerly await a response regarding this submission.

Regards,

Neil Madden
