Dear Toby

I am a resident of Grabben Gullen. I received a Gullen Range WindFarm Project Update pamphlet in the mail box and would like to make a submission about the movement of the turbines. The nearest turbine is 1600metres from the house on a 25 Acre block. I have another 25 acre block with no building on it, and I am at a point of confusion foe being able to get Building Requirements and Restrictions information in writing for future buildings. The question in my submission is could this be caused by the proximity of the wind turbines to my farm.

Yours Faithfully Clem Carlon
