To whom it may concern,

As a farmer / landowner who is involved with Gullen Range Wind Farm, I am writing to offer my support to this project and the management of it.

At a recent get-together of farmers / landowners who are involved with the wind farm, we jointly agreed that we would all submit a letter of support. It also allows us the opportunity to voice our concern regarding any further delays to this project. As it would appear nobody has taken into consideration the impact on our lives and business which we have to operate seven days a week.

Having considered the information that is available we feel that that any turbines that has been moved, is justified given the nature of the ground conditions and environmental impact. However all we seem to hear is a few individual voices constantly complaining and delay in this project, without any thought to the impact that it is having on our family's and the way we manage our farms.

We request that this project is allowed to complete rather sooner than later, so that we can get on with what we do best which is managing the countryside.

Sincerely,

A handwritten signature in dark ink, appearing to be "N. Maberly", written in a cursive style.
