

To whom it concerns:

I am wholly opposed to this disgusting waste of tax payers' money, and living nearby, in Greens Road will suffer at every point of this development's schedule, during and beyond.

I stand wholly behind every one of Clover Moore's points on this, to call on the Government to:

- Build a safe, accessible stadium: The proposed design includes very poor outcomes for a continuous accessible path of travel from the stadium to Driver Avenue.
- Reduce the scale of the new stadium: the 'bowl' roof form will increase the height of the stadium to its east and west. This is bulky and excessive next to a heritage conservation area.
- Build a transport management plan that keeps people out of cars: the proposal does not discourage people from driving to events. Traffic congestion will worsen if a reduction in on-site car parking is not prioritised. Additional public transport services and adequate bicycle parking facilities must be operating from the moment this stadium opens to meet demand.
- Keep parking off Moore Park: We must ensure this parkland is protected, and not used as overflow parking for private vehicles.
- Call off the chainsaws for trees near the stadium: Tree removal to accommodate pedestrian access from Moore Park Road has not been justified, and this application does not outline any plans to replace lost trees.

Yours sincerely

Graham Lauren
