

SYDNEY FOOTBALL STADIUM (STAGE2 DESIGN, CONSTRUCTION AND OPERATION)

SUBMISSION-  
from Kevin Eadie

Drummoyne NSW 2047.

Application No SSD-9835

I OBJECT TO THE PROPOSAL on the following grounds -

- 1 - The noise from the events at the stadium will be excessive about the buildings at Sydney Boys High School. No guarantee is given that the school buildings will be suitably noise-insulated to enable conversations to take place within the lecture rooms.
- 2 - Car parking on Moore Park West must cease. There is no guarantee that this will occur.
- 3 - the wide stairway from Driver Avenue is not wheelchair friendly, and the stair itself could be dangerous under large crowds, especially if they were in a hurry. The stair should be eliminated, and access to the stadium provided "on the level".
- 4 - I could not lodge this submission on-line because your website would not accept my chosen password and would not tell me what was unacceptable about the password. Hence I was not able to lodge this submission by the close of business on 17.7.19. I had to send it by mail, to

Planning Services  
Department of Planning and Environment,  
GPO Box 39  
SYDNEY NSW 2001  
Attention: Director – Social and other Infrastructure Assessments

5 – Driver Avenue is a public road. It must remain open at all times. I have been seriously inconvenienced in the past when it has been closed to accommodate crowds accessing the former stadium.

I have not made any declarable political donations.
