

To whom it may concern

PCU067741

I would like to submit my objection to any toxic waste, hazardous material disposal incinerator in Mitchell Ave Kurri Kurri,

My home in Weston was constantly subject to foul smells, and constant noise from the recently closed aluminium smelter and I know the toxic fallout from any incinerator will cause the same sort of fouling of the local environment.

Surely there are other sites, away from residential areas where this sort of disposal can take place.

For goodness sake, we have only just got rid of one toxic site and you're planning to subject us to another.

No thank you!

I absolutely object!
