Mr & Mrs B Johnson
12 Callaghan St
Kurri Kurri
NSW 2327.

To whom it may concern.

My husband and I are We are Both in our fifties
and lived here most of our lives.

We have Great Concern for this proposal
we have lived with Alcan fallout plus Dross.

We live at the bottom of town where all
the pollution from open fires, the new
highway fumes all Rain down on us!

Why does this toxic Incinerator, have to
be in our town? So close to Residents.

What Cancer Causing agents will be
liberated as microbes & Particles once this
heavy waste is incinerated? What filtration

measures can stop microbes & Particles?

We do "NOT" want this in our town! and we
will do whatever it takes to Protest this
Toxic Pollution!

Scanning Room

Surely there is a better site for this. There is already a High Rate of Cancer and other illnesses, Are these caused from the Industries we've had here for years Alcan and Dross? I have medical issues, my grandchildren have asthma and live in here.

Please Consider another Site for this. Away from Residences. The High School is less than 500 metres away from Proposed Site! Why should we be subjected to this health Risk?

Yours Sincerely

Mr & Mrs B Johnson

B Johnson
