To Whom it may concern,

The submission for a hazardous waste incinerator in this area is not appropriate and is unacceptable. We already have a dress plant and concrete recycling plant which causes dust noise.

The roads in Kurri Kurri Weston area are in a disgusting condition, the waste will be transported by road, if so a lot of upgrades will be needed, we also have the worry of contaminated water.

The proposed site would only be 800yds from our home the way the crowd flies, we are in a ENE wind direction which will bring more noise smell to the area, there must be a better place for this facility away from homes.
