Re application by Weston Aluminium to process medical & other toxic waste.

Application ssd15_7396

People I talk to consider it a waste of time to object to anything Weston Aluminium wants, because it will be approved regardless of how many objections received. People of Kurri Kurri are not happy with Weston Aluminium. But I object to the proposal. We get enough pollution now. It was stated in the submission that the nearest house is 600 metres away, not true, Railway parade where the late Terry Kelly & others lived was 160 metres away, he complained about the pollution & was condemned by Weston Aluminium & their supporters & he died of throat cancer. We live app 500 metres downwind next to a school of app 700 students. The amount of waste is amazing 8000 tonnes pa that amounts to 154 tonnes a week or 2 ten tonne trucks of toxic waste a day. I am being treated for cancer at the Mater hospital, & when I am there I am surprised to see other people from Kurri there & some have since passed away..

Adding more toxic fumes to our air will only cause more health problems here as a lot of the time we have to keep our doors & windows closed because of the fumes that burn your throat. At night I can go outside & shine a torch in the air & it looks like a snow storm in the beam, I have demonstrated this to a Labor councillor & yes nothing happened. Just as I have given up to make complaints, nobody takes notice or cares. The pollution is much worse at night & with still air. Give us a fair go as this plant was put in the wrong place in the first place it is too close to residents and school.

Regards, Des & Lynn Mills
