Kurri Kurri 2327

18th October 2016

Dear Sir,

I have asthma and have had it most of my life. I have been in and out of hospital and that includes Intensive Care and Special Care.

Kurri Kurri used to be surrounded by coal mines which pumped out dust and gasses by exhaust fans. Kurri Kurri had an aluminum smelter which caused problems. It was sad that people lost their work. The smelter has been closed for a couple of years and I have been feeling better in my health.

We have a Dross Plant here in Kurri Kurri and we do not need any more pollution.

Question.

Is it true that a town near Toowoomba Queensland Knocked back a similar type of waste disposal?

Yours Sincerely

Brian Witherspoon.
