Re: Proposed Hazardous Waste Incinerator, Kurri Kurri

My reason for rejecting the construction of the above is that it would be too close to houses and the general public and dangerous to the elderly + children. There is also in that general area, there is a crushing plant for brick + concrete building waste, which since it's opening brings dust into our area on a prominent Westerly breeze.

So I say build your waste Incinerator somewhere away from the general public

Thankyou
Yours
