

To,

Department of Planning and Environment,

Re:

Forensic pathology and coroner's court,

Lidcombe

Project number 7545

I as a resident of 19 Eucalyptus Street, Lidcombe, NSW, 2141 (Botanica) would like to raise my concern in relation to proposed entry to the development of above site. I understand that the proposed entry will be from Main Avenue. I along with many other resident are concerned about this entry for the project. My concern are that currently main Avenue traffic is minimal as it used only by local residents. There are children riding bikes and walking around as there is a park nearby. Also there is multiple sclerosis centre within Botanica and many of its residents who are on their wheel chair go around the state. At this stage they feel safe as traffic is minimal and only of local residents. My and majority of residents fear is that with proposed entry the traffic load will increase on Main Avenue and it will be unsafe for children and disable people on Main Avenue.

I would propose use of current entrance from Weeroona Road which is a wide street and most traffic use this street.

I would appreciate if you can look in to this concern and consider changing the entrance from Main Avenue to Weeroona Street for this project.

Waiting for your reply
