Dear sir,

Regarding Mackas Sand project,

We are having problems with the noise of traffic as it is at present. We must have all our doors and windows closed to hear the TV. The noise of traffic keeps us awake at night. Any increase in traffic noise especially noisy B Doubles will make it really unbearable. Compression braking for the roundabout can be heard very clearly and is very annoying. We have complained before with no result. The local council commissioned a noise survey when the road was widened. The receiver was in between the north & south strips and according to the 5 year old technician who completed the operation we did not receive any more noise than before the road was widened. Supposedly if the north bound traffic went through Medowie road we would be in a vacuum as far as noise is concerned. Please help us overcome this problem.

Regards

Lorraine and Errol Deamer
