Subject: Mount Pleasant mine

Why was Mount Pleasant mine ever approved it's located 5 km out of Muswellbrook every time they let off an explosion it sends a shockwave through Muswellbrook and the houses shake. Mostly felt in South Muswellbrook the wind usually comes from the direction of Mount Pleasant and blows directly into Muswellbrook with all the dust and dust from their explosions our cars are grey from dust from Mount Pleasant. And they are ruining the underground water supply, our houses are full of dust and cracks, so please do not extend the mine.

Dean.

Subject: Mount Pleasant expansion

Who in their right mind approves of a mine which is 5 km from Muswellbrook where the wind comes from and blows towards Muswellbrook most of the time, shockwaves from explosions travel into the town and it causes houses to shake and vibrate, underground table destroyed, River polluted, houses full of dust, car is covered in grey dust, farm land destroyed, Muswellbrook is becoming an island with all the mine around it, traffic jams on the highway from miners travelling back in from work,

Dean.
