Dear Ms Masters

**Woodlawn Bioreactor (MP 10\_0012 MOD 2 and DA 31-02-099 MOD 3) Collector Road, Tarago**

Thank you for providing the Office of Environment and Heritage (OEH) with the opportunity to comment on the above modification proposals and associated information on Tuesday 4 July 2017. We have reviewed the information in relation to impacts on Aboriginal cultural heritage and biodiversity matters and provide the following comments:

**Aboriginal cultural heritage**

OEH notes that there are no Aboriginal cultural heritage sites currently recorded within the proposed leachate treatment plant footprint. OEH is satisfied that the Proponent has undertaken to continue to apply existing approval conditions which include appropriate safeguards if unexpected Aboriginal sites are found during construction. OEH recommends that the Modification consent reflects this undertaking and existing consent conditions.

**Biodiversity**

OEH understands that the site proposed for the leachate treatment plant, pipelines and associated infrastructure is highly disturbed and devoid of flora and fauna habitat, and agree that there will be no impacts on biodiversity as a result of the modification. Accordingly, there are no additional conditions of consent recommended for biodiversity matters.

If you would like to discuss the above comments further, please contact Lyndal Walters on 02 6229 7157 for biodiversity matters, or Jackie Taylor on 02 6229 7089 for Aboriginal cultural heritage values.

Yours sincerely

  
ALLISON TREWEEK 21/7/17
