Mangoola Continued Coal Operations Project SSD-8642

I object to this proposal on the following grounds.

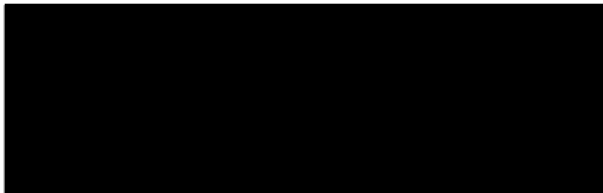

- The devaluation of my property price.
- The negative impact on the ability to sell for a fair market price if I wanted to.

I have spent over \$80,000 replacing the roof and gutters which were damaged by coal residue. The negative impacts of the existing operations are already too great.

We are already suffer from dust entering the house. Our home is a 1903 circa house with open Dutch Gable ventilation. Another open pit mine closer to our home can only increase the dust.

Stock and domestic water is already contaminated from the existing mine. I do not want more contamination.

I have not made any reportable political donations in the last two years.
