Mangoola Coal Continued Operations Project SSD-8642

I object to this proposal for the following reasons;

I have asked for assistance from the existing Mangoola mine with the extra cleaning required because of the increased dust from their operations. No assistance has been offered. I do not want more dust from an even closer mine. I have health problems which mean I am unable to manage the increased cleaning required due to dust from Mangoola's existing operations.

We already have the amenity of our beautiful rural property negatively impacted by the noise from the current mine, I do not want increased noise and dust from the mine coming even closer to us.

I have not made a reportable political donation in the past two years.
