**Subject:** Mangoola Coal Continued Operations Project SSD-8642 - objection

Genieve,

Could I please lodge an anonymous objection to the Mangoola Coal Continued Operations Project SSD-8642 proposal on the following grounds:

- additional and continuing dust emissions adding to the already extremely poor air quality in the Upper Hunter.
- additional greenhouse gas emissions, both direct and indirect, at a time when record temperatures are being set across the globe and greenhouse gas emissions need to be drastically reduced.
- additional impacts on the already very negatively impacted communities, especially Wybong, to the north of the existing mine.
- threats to the wildlife corridor from the Great Eastern Ranges to the Manobalai Nature reserve.
- continuing noise emissions.
- destruction of property value.
- another final void left by mining operations.

Thank you,
