Acting Director Infrastructure Projects
NSW Planning and Infrastructure
GPO Box 39
SYDNEY NSW 2001

Dear Felicity

BROWN'S CREEK TO ORANGE GAS PIPELINE RELOCATION

I am in receipt of the EIS for the Brown's Creek to Orange Gas Pipeline Relocation and offer comment on behalf of Orange City Council in my role as Director Development Services.

Clearly, Council is aware of this project - as the proponent for the Orange Airport Expansion project.

Council sees no impediment to the approval of this project and sees no reason to apply further conditions other than those imposed routinely by the Department. We note that the project area does not appear to be within the Orange Geological Survey NSW GM 8731 mapping area for Naturally Occurring Asbestos. We note also that the area is heavily trafficked by both cyclists and motorists (including Cadia Mine-related traffic and airport commuters), so attention needs to be paid closely to traffic-management processes.

Thank you for the opportunity to comment.

Yours faithfully

David Waddell
DIRECTOR DEVELOPMENT SERVICES
