

Rix's Creek Modification 10 application

I am writing in **support** of the Rix's Creek Modification 10 application.

I have been an employee of The Bloomfield Group for over 32 years.

During this time I have seen continual change but the business has always maintained a drive to support its people and the community.

The Hunter Valley needs independent Australian owned companies that strive to comply with regulations whilst setting an example for others.

I ask that the Modification 10 be approved to allow the operations to continue with the employment of many employees and contractors until the Modification 8 assessment is complete.
