## Dendrobium Mine: Plan for the Future - Coal for Steelmaking Project (SSD-8194)

Sydney NSW 2001  (address) Social Place Albus Park  supports the proposed Dendrobium Mine: Coal for Steelmaking project (SSD8194).  Reasons for my support are as follows:  Socio-Economic Benefits  ✓ Continued mining would sustain the employment of Dendrobium's workforce, create a further 100 jobs for the life of the Project and an additional 200 jobs in construction.  ✓ The Project will generate around \$714 million in royalties, taxes and rates, contributing to local and state infrastructure and services.  ✓ The Project will result in a total net benefit to the NSW economy of over \$2.8 billion (real, undiscounted terms), including over \$1.1 billion (real, undiscounted terms) to the Greater Wollongong Region.  ✓ The Project would allow South32 to continue to support local suppliers and contractors, providing additional security and longevity of employment in the region.  Environmental Measures and Outcomes  ✓ The Project commits to not longwall mine under water supply reservoirs including dams, or under named watercourses and key stream features.  ✓ The Project commits to a minimum of one-kilometre setbacks from the Avon and Cordeaux dam walls.  ✓ The Project commits to pursue opportunities for industrial users to reuse our excess mine water.  ✓ South32 supports biodiversity research in the water catchment, including swamps and endangered species such as the Giant Dragonfly and the Littlejohn's Tree Frog.  Steelmaking in the Illawarra  ✓ The Project would provide an ongoing and essential local supply of metallurgical coal to BlueScope Steelworks. South32 currently supplies around 60% of BlueScope Steelworks' metallurgical coal requirements.	Attention: Director – Coal and Quarry Assessments Department of Planning, Industry and Environment
(address) S Derwent Place Albus Park  supports the proposed Dendrobium Mine: Coal for Steelmaking project (SSD8194).  Reasons for my support are as follows:  Socio-Economic Benefits  Continued mining would sustain the employment of Dendrobium's workforce, create a further 100 jobs for the life of the Project and an additional 200 jobs in construction.  The Project will generate around \$714 million in royalties, taxes and rates, contributing to local and state infrastructure and services.
