Dendrobium Mine: Plan for the Future - Coal for Steelmaking Project (SSD-8194)

Attention: Director – Coal and Quarry Assessments Department of Planning, Industry and Environment GPO Box 39 Sydney NSW 2001

contributing to local and state infrastructure and services. The Project will result in a total net benefit to the NSW economy of over (real, undiscounted terms), including over \$1.1 billion (real, undiscounted the Greater Wollongong Region. The Project would allow South32 to continue to support local suppliers contractors, providing additional security and longevity of employment. Environmental Measures and Outcomes The Project commits to not longwall mine under water supply reservoir dams, or under named watercourses and key stream features. The Project commits to a minimum of one-kilometre setbacks from the Cordeaux dam walls. The Project commits to pursue opportunities for industrial users to reus mine water. South32 supports biodiversity research in the water catchment, including and endangered species such as the Giant Dragonfly and the Littlejohn. Steelmaking in the Illawarra The Project would provide an ongoing and essential local supply of me to BlueScope Steelworks. South32 currently supplies around 60% of B Steelworks' metallurgical coal requirements.	s including Avon and se our exces ng swamps n's Tree Frog
