Dendrobium Mine: Plan for the Future - Coal for Steelmaking Project (SSD-8194)

Attention: Director - Coal and Quarry Assessments Department of Planning, Industry and Environment GPO Box 39 Sydney NSW 2001 supports the proposed Dendrobium Mine: Coal for Steelmaking project (SSD8194). Reasons for my support are as follows: Socio-Economic Benefits Continued mining would sustain the employment of Dendrobium's workforce, create a further 100 jobs for the life of the Project and an additional 200 jobs in construction. The Project will generate around \$714 million in royalties, taxes and rates, contributing to local and state infrastructure and services. ✓ The Project will result in a total net benefit to the NSW economy of over \$2.8 billion (real, undiscounted terms), including over \$1.1 billion (real, undiscounted terms) to the Greater Wollongong Region. ☑ The Project would allow South32 to continue to support local suppliers and contractors, providing additional security and longevity of employment in the region. **Environmental Measures and Outcomes** ☐ The Project commits to not longwall mine under water supply reservoirs including dams, or under named watercourses and key stream features. The Project commits to a minimum of one-kilometre setbacks from the Avon and Cordeaux dam walls. The Project commits to pursue opportunities for industrial users to reuse our excess mine water. ☑ South32 supports biodiversity research in the water catchment, including swamps and endangered species such as the Giant Dragonfly and the Littlejohn's Tree Frog. Steelmaking in the Illawarra ✓ The Project would provide an ongoing and essential local supply of metallurgical coal to BlueScope Steelworks. South32 currently supplies around 60% of BlueScope Steelworks' metallurgical coal requirements. Other reasons: ☐ I have not made a reportable political donation in the previous two years ☑ I do not want my personal details made publicly available
