Dendrobium Mine: Plan for the Future - Coal for Steelmaking Project (SSD-8194)

Attention: Director – Coal and Quarry Assessments Department of Planning, Industry and Environment	
GPO Box 39 Sydney NSW 2001	
supports the proposed Dendrobium Mine: Coal for Steelmaking proj	ect (SSD8194).
Reasons for my support are as follows:	
Socio-Economic Benefits	
Continued mining would sustain the employment of Dendrobing a further 100 jobs for the life of the Project and an additional 2. The Project will generate around \$714 million in royalties, taxed contributing to local and state infrastructure and services. The Project will result in a total net benefit to the NSW economy (real, undiscounted terms), including over \$1.1 billion (real, undiscounted terms), including over \$1.1 billion (real, undiscounted terms). The Project would allow South32 to continue to support local states of the Project would allow South32 to continue to support local states of the Project would allow South32 to continue to support local states of the Project would allow South32 to continue to support local states of the Project would allow South32 to continue to support local states of the Project would allow South32 to continue to support local states of the Project would allow South32 to continue to support local states of the Project would allow South32 to continue to support local states of the Project would allow South32 to continue to support local states of the Project would allow South32 to continue to support local states of the Project would allow South32 to continue to support local states of the Project would allow South32 to continue to support local states of the Project would shall be project would	200 jobs in construction. es and rates, my of over \$2.8 billion ndiscounted terms) to suppliers and
contractors, providing additional security and longevity of emp	noyment in the region.
Environmental Measures and Outcomes	
The Project commits to not longwall mine under water supply dams, or under named watercourses and key stream features	
The Project commits to a minimum of one-kilometre setbacks Cordeaux dam walls.	from the Avon and
The Project commits to pursue opportunities for industrial use mine water.	rs to reuse our excess
South32 supports biodiversity research in the water catchmen and endangered species such as the Giant Dragonfly and the	
Steelmaking in the Illawarra	3,
The Project would provide an ongoing and essential local sup to BlueScope Steelworks. South32 currently supplies around 6 Steelworks' metallurgical coal requirements.
