SUBMISSION IN FAVOUR OF THE MOOLARBEN MINE – Stage 1 Modification 9

We would like to make this submission in favour of the Moolarben Mine – Stage 1 Modification.

We fully support the project and believe that the current submission is a positive move by Moolarben in making sure that their project runs efficiently and effectively causing minimal impact on the surrounding environment. The extension of the stage one project will also allow the next stages of the mine to run more efficiently.

Moolarben Coal has had a positive impact in the Mid-Western Regional Council area through consultation with locals and also supporting community initiatives and fundraising.

Ian Colley Earthmoving would like to express our full support for the project.

regards

IAN COLLEY
