My objection to the Moolarben Coal Mine stage 2 project is concerning noise levels , dust levels & road traffic noise it is already bad enough & only going to get worse. Stage 1 is already bad enough & no one does anything about our complaints, the mines or the EPA you all just pass it onto other people , yet nothing gets done.

My house gets covered with coal dust which goes into my water tank when it rains & this must eventually cause health problems.

We were here first then your company moved in doing just whatever they wanted , not concerned about anyone living in this area, you try living with these problems we cant even sleep properly at night. Some days i cannot even have my windows open.

So i strongly object to this project stage 2 at Moolarben Mines
