 I'd like to formally object to the MCC PPR Stage 2 plan.

The Drip and Corner Gorges should be transferred into the Goulburn River National Park to ensure their long term protection, appropriate management and legal public access to this regionally significant recreational, educational and cultural river corridor.

As far as I remember the NSW government had promised to phase out coal mining soon. This energy source has already caused major environmental damage to the areas around Ulan, Wilpinjong and Moolarben. Coal mines should be urgently shut down and our energy needs covered by renewables, available aplenty.

Coal Mining is a thing of the past and should not be allowed in the se environmentally important areas. Water, forests, wildlife and have already suffered too much and won't be able to recover if government keeps allowing this exploitation of our country.

As a correspondent and journalist who suggests travel itineraries to europeans it becomes more and more difficult for me to recommend areas around Mudgee and Orange to inbound tourists. Those people don't pay all their holiday money to end up in a coal mining area. They search nature and relaxation, not dust and noise and a damaged environment.

Please make sure that the Corner Gorges and The Drip are protected from the impact of mining.

Yours sincerely  
 Julica Jungehuelsing
