Subject: MADELEINE BLACKWELL - OBJECTION TO MOOLARBEN COAL IN THE AREA KNOWN AS THE DRIP

To whom it may concern,

I am writing to ensure that the area known as THE DRIP be protected from the impact of mining at the Moolarben stage 3 complex.

This area, as well as the Corner Gorges are of great environmental significance. It only takes a walk down there for you to realize how special this area is and it should be preserved and protected for generations to come. The groundwater system needs to be protected in order for this to happen, as without the water in the area, THE DRIP would not be what it is today. Any threat to this area should be impossible, out of consideration, as if we don't save our natural environment we stand to lose more than we can imagine. The wildlife, the water, and the very character of this nation will be destroyed if mining interest are prioritised over the places of great natural beauty and cultural relevance. The public must be able to continue having access to this area.

Yours sincerely, Madeleine Blackwell
